LEVANTE

SHUTTLE LABELS LOOM

efficiency and simplicity at its best

EXCELLENCE IN QUALITY WITH EASIER WAY TO MAINTAIN

MEI INTERNATIONAL: THE KEY TO SUCCESS IN LABEL WEAVING

Labels with softest selvages with eco-friendly yarns. High productivity and quick responses of the machine; **natural fibers insertion** in easy way, without adjustments, with low strength, can also be used in this loom with result of new fashion labels and narrow fabrics design. This traditional weaving construction produces a woven substrate of a uniform architecture and thickness, across the entire width of the material with **SOFT & UNIQUE** knitted edges. Shuttle loom construction is superior and preferred for specific applications like underwear, tubular webbing for jeans, special ribbons for furniture and so on.

PRODUCT OF THE YEAR

LEVANTE SHUTTLE LABELS LOOM

MEI INTERNATIONAL S.R.L.

LOOM FOR WOVEN LABELS PRODUCTION WITH SOFT EDGE

model	max weaving width	reed	nr. of tapes	colors	weft bobbin size nr. 1	weft bobbin size nr. 2	weft bobbin size nr. 3
NFL G20A-2-4	27	34	20	4	25x70	25x70	16x60
NFL G18A-2-4	36	42	18	4	25x70	25x70	16x60

Overall dimension Speed

Height 3.600 mm. - lenght 3.900 mm. - width 2.200 mm.
Up to 150 rpm. max

Large bobbins can move through small shedding.

Because of a jacquard with dowel and inclining shedding motion, large bobbins can be used and an operation becomes more convenient. Less friction between warp and shuttles, enables you using natural fiber and other low-strength yarn.

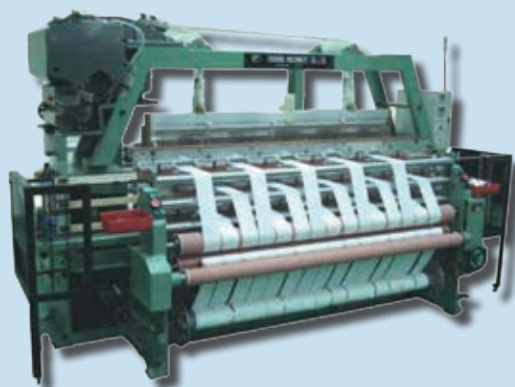

Controller combined Jacquard and loom for a perfect efficiency.

Electronic Jacquard Staubli with controller JC7 for an efficient and easy working system compatible with available files type and system for a better textile patterns standard format of jacquard with 448 or 896 hooks.

High accuracy of pattern length and product size

4 pieces of friction rolls in the take up motion is able to take up woven labels with much less slip. So you have more precise sizes of labels and a life bobbin is also greatly increased. The frame part of a race batten is made of one piece of cast aluminum, so it is very strong and stable and can prevent unevenness of label strength.
